Suggestion if any:

\*All over the performance of offline class is much better and helpful.

\*Regular classes should be taken by the teachers.

- \*Better infrastructures and bigger school campus
- \*It would be so grateful if the college authority gives a graduation ceremony to all the students in general not according to their department.
- \*More clean bathrooms
- \*Noise pollution and must give importance on the cleanliness of washrooms and bigger campus of college should be taken into importance
- \*Our faculty members are very much sincere regarding the academic but should put up more efforts for several activities group discussion and be more friendly and make us comfortable
- \*For 6th semester students note should be provided as there is no proper books available.
- \*For 6th semester notes should be provided and also book should be provided in exam time from library.
- \*Teachers should teach with the help of projector since the number of students are more in class and we are unable to catch What teachers explain. And students can concentrate more if teaching is done through projector...
- \*It will be better if the classes are taken offline on daily basis
- \*Online classes are difficult to catch up
- \*To maintain both online and offline classes at one time is difficult for teachers as well as for students. So it's better if you take either offline or online at one time not both together.
- \*We are facing difficulty as when we are in online classes most of the time, we get disconnected and even our teachers are facing lots of problem to handle both online and offline classes, so hope this problem will be solved.
- \*I would like to suggest just to increase the teaching timings for each period as of for me I feel like taking class for 45 minutes is very less as compared to the vast syllabus we have and the time we get to complete our syllabus. Sometimes since to complete the syllabus before the exam we have to take the class in a very fast mode that in turn creates problem for us to tackle with each subject. In a 45 minutes class 10 minutes goes in taking attendance and the other 5 to 10 minutes in making we students not to talk or not to make noise and so I think each class timing should be increased so that the things go in a smooth way. Thank you
- \*The duration for completing our course should be increased to June or July.
- \*I would like to request the management to start with the regular classes
- \*Regular offline classes
- \*Better to take one side class either online or offline
- \*Safety measures.
- \*Teachers are helpful at any obstacles
- \*No doubt, the teachers are doing great but except for some technical problems we often faced miscommunication and missed out classes.
- \*According to me, the following test we have been conducting since the last week is very helpful for us, especially when the exam approaches it would be easier for us to grab it since we have studied some of the topics so it won't be tough for us to learn and since some of the topics is going to be familiar to us. But I also strongly feel like "what if we take the test like one subject in a week "? Or maybe two that's not a problem. Because sometimes it happens that we tend to skip some subjects because of the particular subject to study as I or we in general can't study the whole subject at a time. And it's very difficult for us to grab it all together.
- \*It will be better if classes resume fully offline not on offline and online mode alternatively

\*As per my perception, teachers are trying their best to provide us with each and every possible facility, but we are facing a little problem in practical papers due to online and offline classes. Practical papers should be held in class i.e., offline and it can be understood in a better way like that. Thank you

\*One of the best colleges with outstanding faculty members but would have been much better if the college has a free space environment.

\*I would like it more if there won't be any online classes as sometimes the network isn't good and we find it hard to connect again...

\*No suggestions

\*No. Everything is going efficiently.

\*Online classes is not good couldn't understand anything sometimes network problem.

\*Teachers should be more understanding and forth coming instead of making students feel low due to their failures, they should help in tackling the problem or at least be nice to students.

\*Teachers are really VERY rude towards students.

\*Online and offline mode should be continued as usual...

\*During this pandemic season every teacher tried their best to let us learn and understand everything which they are teaching and till now I could say that they are keeping up their best to provide the best way of teaching for our understanding and never fail to clarify our doubts....

\*Thank you to all the teachers from my heart...

\*My online learning experience as a student is not so good.

\*I personally suggest to stop having online classes and start having offline class every day or maybe thrice a week.

\*All teachers are good and friendly....

\*Offline n online mode is difficult because online network is to bad n few topics are missed because of network...

\*Overall, the teachers are trying to teach us by giving their best.
