(6th Semester)

COMMERCE

Paper : BS-603

(Business Statistics)

Full Marks : 70 Pass Marks : 45%

Time : 3 hours

(PART : B—DESCRIPTIVE)

(Marks : 45)

The figures in the margin indicate full marks
for the questions

1. (a) Define statistics. Explain the nature and importance of statistics. 2+7=9

Or

- (b) What do you mean by diagrammatic presentation? Discuss the different types of diagram. 2+7=9

TYPE

nature of
gulator(s)

(2)

2. (a) From the following data, calculate median marks : 9

Marks	f
10-25	6
25-40	20
40-55	44
55-70	26
70-85	3
85-100	1

Or

- (b) Calculate Spearman's rank coefficient of correlation from the following data : 9

X	53	98	95	81	75	61	59	55
Y	47	25	32	37	30	40	39	45

3. (a) What do you mean by index number?
Explain the uses of index number. 2+7=9

Or

- (b) Construct quantity index for 2007 with 2005 as base year from the following data using Fisher's ideal method : 9

Commodities	2005		2007	
	Quantity	Price	Quantity	Price
Wheat	3	10	4	14
Milk	4	15	4	16
Rice	6	12	7	18
Fish	2	20	3	25
Sugar	3	10	4	12

L25/840a

(Continued)

(3)

4. (a) Discuss the various measurements of trend in a time series. 9

Or

- (b) Find the trend value for the following time series by using three-yearly moving averages : 9

Year	Production (in '000)
1980	12
1981	11
1982	16
1983	15
1984	17
1985	28
1986	18
1987	23

5. (a) Define census method. Distinguish between census method and sample method. 2+7=9

Or

- (b) An urn contains 8 white and 3 red balls. If two balls are drawn at random, then find the probability that (i) both are white, (ii) both are red and (iii) 1 is red and another 1 is white. 9

Paper : BS-603

(Business Statistics)**(PART : A—OBJECTIVE)****(Marks : 25)**

The figures in the margin indicate full marks for the questions

1. Choose the correct answer and place its code in the brackets provided : 1×10=10

(a) The quickest method of collecting primary data is

- (i) mailed questionnaire
- (ii) telephone interview
- (iii) enumerators
- (iv) information from correspondents

(b) The final stage of collection and compilation of numerical data and forms, the initial stage of analysis and interpretation is

- (i) tabulation
- (ii) classification
- (iii) frequency
- (iv) distribution

[]

(c) Square of standard deviation is called

- (i) mean deviation
- (ii) quartile deviation
- (iii) variance
- (iv) None of the above

[]

(d) Correlation coefficient lies between

- (i) 0 and 1
- (ii) -1 and 1
- (iii) -1 and 2
- (iv) 0 and 2

[]

2. (e) The index numbers are expressed in

or False (F) by putting a Tick (✓) mark :

(i) alphabets

(ii) numbers

(iii) percentages

(iv) None of the above

(b) Median and mode are called positional averages.

(f) The index number which gives downward bias is

(i) Paasche's index number

(ii) Laspeyres' index number

(iii) Fisher's index number

(iv) Bowley's index number

(g) The sum of seasonal indices using additive model is equal to

(i) zero

(ii) one

(iii) two

(iv) three

(4)

(h) A business cycle is an example of

(i) cyclic variation

(ii) seasonal variation

(iii) irregular variation

(iv) All of the above

[]

(i) The Central Statistical Organization (CSO) was established in

(i) 1951

(ii) 1952

(iii) 1953

(iv) 1954

[]

(j) An event that can split into two or more events is

(i) independent event

(ii) dependent event

(iii) exhaustive event

(iv) composite event

[]

(5)

2. State whether the following statements are True (T) or False (F) by putting a Tick (✓) mark : 1×5=5

(a) Primary data are original in nature.

(T / F)

(b) Median and mode are called positional averages.

(T / F)

(c) The longer the period of moving average, the smoother is the trend line likely to be.

(T / F)

(d) Fisher's ideal index formula satisfies circular test.

(T / F)

(e) Sampling errors are present in census method.

(T / F)

(6)

3. Write short notes on any five the following : $2 \times 5 = 10$

(a) Primary data

(b) Classification

(7)

(c) Objectives of dispersion

(6) (8)

(c) Objectives of dispersion

(a) Primary data

(9)

(d) Scatter diagram

(10)

(e) Index number as economic barometers

(11)

(f) Base shifting

(12)

(g) Seasonal variation

(13)

(h) Trial and events
